Graphic Design: Adobe Photoshop CS3, Adobe Illustrator CS3, Adobe Flash CS3, Adobe InDesign.

Administration: SQL Server 7/2000/2005, Microsoft IIS, Windows Server 2000/2003, Apache, UNIX.

Database: SQL Server, MySQL, Oracle.

Other: AJAX, Web Services, Community Server 2008, Telligent Community 5.0, SharePoint, Subversion, Perforce, SourceSafe, JBOSS, Akamai Streaming/CDN, Multimedia Development, Rich Internet Applications, Web Application Development, SEO, and Social Media Marketing/Promotion.

Industry Experience:

MB Trading – Plano, TX 2005 – Present
Senior Web Developer (Developer III)

Develop web applications using ASP.NET 3.5+ and maintain legacy sites written in classic ASP and PHP. Responsibilities include managing web servers and corporate websites (internally and externally facing), building user communities, creating Rich Internet Applications, preparation of management status reports, coordination and technical direction of social media marketing efforts. Familiar with the Agile development methodology.

- Served as lead developer on multiple projects; a favorite being a custom Silverlight media player streaming live and on-demand training videos twenty-four hours a day to thousands of customers.
- Built TradingViews.com using the Telligent Community 5.0 framework, ASP.NET 3.5, JQuery, MSSQL, and widget-based components. TradingViews hosts streaming video training for financial traders looking for information on trading various markets.
- Developed multiple JQuery plug-ins and scalable widgets for distribution on local and affiliate networks.
- Currently working on a Silverlight-based financial trading application with integrated charts and trading functionality.
- Advisory role on Flash, CSS and JavaScript programming skills to a team of designers.
- Leadership skills acquired while managing projects, contractors and co-workers.

Yokld.com – Dallas, TX
Chief Technology Officer/Owner

2007 – 2008

Teamed with two partners on a web application competing against Yelp, CitySearch and others to provide a more democratic opinion engine for rating small businesses within a local spectrum.

- Composed an ASP.NET 2.0/AJAX application to find great local businesses positively and negatively rated by a community of users.
- Leadership and organizational skills attained through project planning and implementation.

Campus Crusade for Christ International – Austin, TX
Technology Specialist

2003 – 2005

Addressed the technical needs of staff in a four-state region (TX, OK, LA, and AR). Performed a wide variety of duties including building dynamic websites, maintaining a small data center, developing media resource CD's for distribution and general tech support.

- Built websites using LAMP technologies.
- Managed and designed databases and maintained twenty-five workstations.
- Lead and directed a team of fifteen students and four staff on a two month outreach project in Florence, Italy.

NetSuccess Inc. – Dallas, TX
Lead Web Developer

2002 – 2003

Developed numerous websites for large, mid-sized and small businesses using technologies including Cold Fusion, Fusebox, SQL Server, ASP, PHP, XML, Flash and JavaScript.

- Worked closely with clients to ensure smooth running projects and overall satisfaction.
- Collaborated with a graphic design team to exceed the expectations of each client, creating usable and eye catching web solutions.

Lockheed Martin, Enterprise Information Systems – Denver, CO
Web Developer/Intern

2001

Developed an internal database-driven website to track audits and self-assessments throughout the company utilizing ASP, VBScript, and SQL Server. This site serves as a central information source for EIS Ethics and top-level management.
